

SMC 2016

WORKSHOP ON BRAIN-MACHINE INTERFACES

IEEE INTERNATIONAL CONFERENCE ON
SYSTEMS, MAN, AND CYBERNETICS
BUDAPEST, OCTOBER 9-12

Second IEEE Brain Initiative Meeting Held During SMC 2016 BMI Workshop October 11, 2016

The IEEE Brain Initiative was launched with the mission to facilitate cross-disciplinary collaboration and coordination to advance research, standardization and development of technologies in neuroscience to help improve the human condition. After the success of the first IEEE Brain Initiative Meeting which took place December 2015 at Columbia University, we invite you to participate in the second IEEE Brain Initiative Meeting, where you will hear about the latest brain research and developments from various societies and councils involved in this initiative, and be a part of the strategic discussion to plan for new endeavors and identify new opportunities.

It is free to attend the IEEE Brain Initiative Meeting, which is held during the SMC2016 BMI Workshop. We highly encourage participants to the IEEE Brain Initiative Meeting to also register and attend the SMC2016 BMI Workshop. The IEEE Brain Initiative is a technical co-sponsor, along with eleven (11) S/Cs and the IEEE Standards Association, of this Workshop. The BMI Workshop has a robust schedule of activities including a 2-day brain hackathon, a session from industry leaders sharing their success stories in bringing research to the market, and an IEEE Standards Meeting on clinical and non-clinical BMI/BCI. Deadline for early registration for the SMC2016 BMI Workshop ends on July 9, 2016.

Visit brain.ieee.org for more details.
